McKesson QuickStart Program  
For Medication Safety  
That's *Ready to Go!*

# Introducing McKesson Quick

**G**etting a medication safety program started can be daunting. Yet taking that critical first step can yield enormous benefits to patients, nurses, physicians and pharmacists. At McKesson, we have a new program to get you up and running. The McKesson QuickStart Program for bar-code medication administration is a fast, easy and smart way to launch your overall medication safety initiative. **In less than six months**, you can ensure that the *right* patient gets the *right* medication in the *right* dose via the *right* route at the *right* time.

## McKesson QuickStart Program is...

**FAST.** McKesson QuickStart Program includes Horizon Admin-Rx™ and the technology, services and solutions to unit-dose package, bar code, scan and verify all patient medications. Your clinicians will have the tools they need, in six months or less, to significantly reduce medication administration errors.

**EASY.** We make it easy for your nurses to ensure the “five rights” of medication administration. In real time, nurses can easily capture medication administrations in an electronic MAR, eliminating paperwork and reducing inaccuracies.

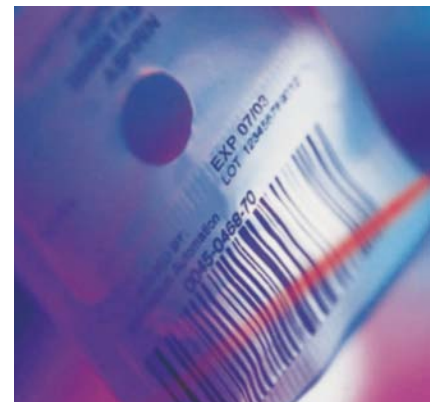

**SMART.** More than a third of all errors occur during medication administration, and bar-code technology is a smart and critical tool for patient safety. Based on proven customer successes, the McKesson QuickStart Program includes the clinical consulting expertise and the measurement and reporting tools you need to benchmark and track your success. The program also includes a customizable customer publicity kit to build broad awareness of your patient safety initiatives.

Learn more about the McKesson QuickStart Program on our Paths to Patient Safety Web site ([www.mcksafe.com](http://www.mcksafe.com)). When you “request more information,” your account executive or a McKesson medication safety consultant will contact you to explore the benefits of this limited-time program.

**McKesson  
QuickStart Program

# You Can Count on McKesson — From Start to Finish!

## Collaboration

We know you take medication safety seriously, and so does McKesson. When you get started with the McKesson QuickStart Program for medication administration, we'll be with you every step of the way.

## Experience

We've been at the forefront of major breakthroughs in medication management — including bar-code medication scanning and robotic drug dispensing — harnessing the power of information, automation, distribution and packaging solutions. No other company delivers a comprehensive solution that helps ensure safety at every touch point of medication management.

## Commitment

McKesson is committed to improving medication safety, from technology for hospitals to consulting services for improving processes and patient outcomes. And we're ready today to QuickStart your medication safety initiative with bar-code technology that ensures positive patient ID and the safest possible care.

## McKesson – The Safe Choice

“We have a zero tolerance regarding medication errors. We put an environment in place that helps support patient safety. McKesson is a proactive and supportive partner; adding value immediately.”

Michael Bryant  
President and CEO  
Methodist Medical Center  
Peoria, Ill.

“McKesson’s medication administration solution helped us with the nursing shortage. Nurses are busier today than ever before, and we must provide them with solutions to help them protect their patients. They thank us for it.”

Peg Spisak, RN, MPM  
Director of Quality and Risk Management  
Ohio Valley General Hospital  
McKees Rocks, Penn.
